The total sales of stocks to-day were 232,914 shares, including the following: Atchison, 4,700; Lackawanna, 11,971; Erie, 3,400; Lake Shore, 8,405; Manhattan, 4,500; Missouri Pacific, 11,605; North American, 6,460; Northern Pacific, 3,510; Northern Pacific preferred, 14,055; Pacific Mail, 4,770; Richmond & West Point, 7,591; St. Paul, 15,050; Union Pacific, 15,100; Western Union,

g.806. The stock market to-day was more active and stronger, the strength shown being entirely out of proportion to the increase in the volume of business. The improvement in prices was well distribpreferred, Western Union, Missouri Pacific and Pacific Mail. It will thus be seen that the Gould stocks were the leading group of stocks in the market, but the grangers, especially the corn roads and the Vanderbilts, were not far behind. There was no news of special importance to boom the general list, but brokers report more inquiry from outsiders. The opening this morning showed a stronger and more confident tone and Lake Shore started the upward movement, the traders detecting what they suppose to be inside buying. This induced considerable covering of shorts and the brokers who have been short of the market for some time were prominent in bidding up prices all throughout the day. The result disclosed the fact that the short interest in the grangers was larger than generally suptaking into consideration the limited market we have had the past two weeks, and Burlington and Rock Island early became features in the upward movement. Reports from Washington that the subsidy bill was akely to come up again started Pacific Mail up again, and the announcement that the Manhattan company directors had decided to take the suburban rapid transit from the syndicate controlling it gave Manhattan a boom, and it scored the largest advance of the day. Wheeling & Lake Erie showed good buying all the way out, and on comparatively light transactions scored material gains. The sluggish stocks were the Villards, New England and the industrials, but none of these failed to make some sort of a gain. Silver was com-paratively quiet, and yielded slowly, making only small fluctuations during the day. The stock of silver in this city continues to accumulate slowly, but holders are reluctant to sell, hoping for more favorable developments in the near future. The advance was subjected to several halts, caused by realizations of the profits accrued by the trading element, but while the best prices were shared in the last hour by this means, the close was steady to firm, while quiet, at close to the highest prices of the day. The

Railroad bonds were quiet, and, while generally strong, showed no material movement in either direction, though there were a few marked gains among the inactive issues. The total sales reached

TRADING AT CHICAGO.

Another Big Bulge in the Grain Markets-

Provisions Dult.

CHICAGO, Feb. 2 .- Indifferently firm cables, snow falling in the winter-wheat region, rain in California, and a much smaller decrease in the visible supply than had been expected, were powerless to arrest the strong upward tendency of prices for wheat, in view of the fact that some heavy "shorts" both here and at St. Louis were covering their short lines. Pardridge was the biggest local target at which the "bulls" hurled their missiles, but St. Louis "shorts" were known to be on the anxious seat, and before the close there was a rumor that a member of the famous "Art Club," of that ! city, was in financial straits. The price of wheat for May stood 3se higher at the close to-day than it did on Saturday, or 11sc lower than the highest point touched today. The crowd, while expect-

ing a decline, was, it afterward appeared, prepared to join in on the opposite tack in an enthusiastic manner, should circumstances incline in that way. The opening price for May was an indication of the influence which might ordinarily be looked for from such news as had then been received. The opening price was anywhere from 991ge to 9934c, or 4c to 34c below its closing price on Saturday. The slight reaction named was, however, of only momentary duration. Before twenty minutes of the session had gone by the price had advanced to \$1.0134, just enough selling at the extreme price to make a quotation. There was trading on an immense scale all over the pit, the feeling was one of intense nervousness, and the succeeding fluctuations were frequent and heavy. A decline to \$1.0012 was succeeded by a re-action to \$1.0112, and that again by a slump which left the price at \$1.0034 ten minutes from the close of session, and the excitement and nervousness continued to the close. The strength in corn was due principally, as was the case in wheat, to the nervousness of the "shorts." From 531sc at the start, May corn made a quick advance to 54c, chiefly under Hutchinson's efforts to buy, and then subsided to around 53 \$40 when he had desisted. Pardridge succeeded Hutchinson as the most active buyer, and his brokers paid 54 40 before he in turn had secured enough. The oats market was very active and at times greatly excited. The crowd was bullish, ally excited. The crowd was bullish, although the news was of a bearish nature.
The provision market was irresponsive to the excitement and advance in prices of grain. Trade was rather dull and the grain. Trade was rather dull and the grain. feature of it was the desire of the "longs"

Wheat - The opening was excited, at a decline of 380 from Saturday's closing prices, sold off 3se further for May and 1se for July. The market immediately improved, however, although a nervous feeling prevailed. The improvement was followed by a rush to buy, and, outside markets being higher, prices jumped upward by large fractions until a 212c advance was scored amid wild excitement. The small decrease in the visible supply helped to depress the market, and only a small reaction occurred near the close. The final prices were 380 1380 higher than Saturday's close. Dry Goods.

NEW YORK, Feb. 2.-There was no material change in the volume of business in dry goods. though there are a good many buyers in the mar-ket. The demand continues to be limited largely to actual wants in sight. Seasonable specialties have the most attention, and there is a fair business in fine and medium brown and bleached cottons, wide sheetings and colored cottons. Prices are firm and the market is in good shape. Men's wear woolens move along slowly, but agents regard the season as promising a good business. Woolen dress goods were in fair request.

NEW YORK, Feb. 2.—Pig-iron quiet. Copper nominal; lake, February, 14.30c. Lead irregular; domestic, 4.40c. Tin active and easier; Straits, ST. LOUIS, Feb. 2.-Lead firm and in fair demand; soft Missouri, 4.15c.

INDIANAPOLIS MARKETS.

Trade Fairly Active with Steady Prices Prevailing.

INDIANAPOLIS, Feb. 2.-The month opens with trade fairly active and prices in most lines of goods firm and steady. That the trade of February will be quite satisfactory is the prevailing opinion among wholesale merchants. They base this opinion on the fact that stocks carried by the retail men all over the country are down to a minimum, and the money market is daily becoming easier, and the two combined will naturally lead to the retail merchants beginning to stock up more freely. In prices to-day there were no important changes. In the produce markets there is a good deal of activity, and everything in the fruit and vegetable line carries a firm tone so far as prices are concerned The week begins with a steady poultry and egg market. Choice butter is in brisk demand. Poor stuff sells slow. The drygoods men report trade as up to their expectations, and firm prices rule all along the line. In groceries the distribution is a little slow; country roads are bad, and it is difficult to move heavy groceries any great distance from the railways. The hide and leather markets are steady in tone and an average winter business in progress. Other markets present no new features.

Chamois skin may be cleaned by rubbing into it plenty of soft soap and then laying it for two hours in a weak solution of soda and warm water. At the end of this time rub it until it is quite clean, rinsing it in clear warm water in which soda and yellow soap have been dissolved. It should then be wrong dry in a rough towel, pulled and brushed. This process makes the leather soft and pliable. It should never be rinsed in clear water. The soapy water causes it

DR. STEDMAN'S IMPROVEMENT IN

Patented Sept. 24, 1889, and Feb. 25, 1890. This improvement dis-

penses with the large suction plate in common use for partial dentures. It will also supplant "bridge work" in large measure, which latter is difficult to fit and involves the destruction of valuable teeth. The plates are very small, about one-quarter to one-eighth the usual size. Being con-structed on true mechanical principles, they fit the mouth with perfect accuracy. This system applies mouth with perfect accuracy. This system applies to all cases having one or more natural teeth remaining on either jaw. The patent granted February 25, 1890, is for an improvement in metallic plates. The best material for this purpose is gold. Other materials have a special utility, but gold is to be preferred. With this method a perfect fitting gold plate can be made which has never been accomplished before, owing to the warpage that invariably occurs in soldering the clasps and teeth to the plate.
